

OMEX Garland

FUNCTION

OMEX Garland is a natural soil amendment product which when applied around the root system as an effective soil conditioner. It both provides sulphur and has a general biostimulating effect. Garland is approved for use by organic farms by the UK Organic Farmers & Growers.

DESCRIPTION

OMEX Garland is a unique concentrated water soluble suspension based on garlic extract produced by cell-burst technology. The garlic extract, containing allicin, is co-formulated with another naturally occurring plant extract which acts as a synergist.

Typical Analysis of OMEX Garland

| | | Wt/Wt* |
|-------------------|-----------------|----------------|
| Sulphur | S | 4000ppm |
| | SO ₃ | 10000ppm |
| pH (10% solution) | | 4.5-5.5 |
| Specific Gravity | | 1.1-1.2 @ 18°C |

*For registration purposes Wt/Wt concentrations are recommended.

DIRECTIONS FOR USE

The spray tank should be filled with half of the required amount of water. Measure the required amount of OMEX Garland and add to the tank whilst maintaining constant agitation. Add remaining water to correct dilution. Spray.

75

DILUTION: Recommended water rate is
200-1500 Litres per hectare

Always shake container before opening

Recommendations for use:

| APPLICATION | RATE | APPLICATION DETAILS |
|------------------|-------|---|
| Soil Application | 5L/ha | Initially, followed by 3 applications of 1L/Ha. |

N.B. For best results, apply OMEX Garland through drip irrigation systems with regular nutrient feeds.

TANK MIXING COMPATIBILITY

OMEX Garland is compatible with most, but not all, pesticides, growth regulators and micro-nutrients with regard to physical tank mixing and biological effects on the crop. However, OMEX cannot accept any liability for any loss or damage as not all pesticides have been tested and because the efficacy of any mix will depend on, among other factors, the pesticide concerned, crop conditions, growth stage, weather and volumes of water used.

PRECAUTIONS

OMEX Garland should be stored in frost free conditions with optimum storage range between 5-40°C. OMEX Garland is a non-hazardous and non-flammable foliar fertiliser. Gloves and face shield should be worn when handling the concentrate. In situations of prolonged storage there may be slight settling of the nutrient particles. This is reversible on shaking.

PACKING: OMEX Garland is available in HDPE drums of 0.25L, 0.5L, 1L, 3L, 5L, 10L capacity. Drums are fitted with tamper evident closures. 200 and 1000 Litre mini bulk available.
